

## SOUND DIVIDER PRICE LIST

**SOUND DIVIDER** Acoustic desk, wall and free standing screens are an eco-friendly partitioning device designed specifically to help improve your environment both aesthetically and acoustically. The use of high sound absorbing material allows the screens to absorb and dampen sound, thus enhancing the quality of your environment and removing reverberations. Additionally it adds an element of privacy to your working environment.

**SOUND DIVIDER** Is made with recycled polyester fibres throughout the range. It is fabricated at 12mm in thickness to create the best acoustic properties possible, has a diverse selection of vibrant colours, sizes and a unique category of patterns to complement your space.

### ECO Friendly

The material is the most sustainable plastic out there. PET is made from recycled bottles and packaging, finely ground down and processed into fibre. From these fibres mats are made, which are then felted. That felt is heated and pressed into a panel.

### NCR Rating

0.8. The Noise Reduction Coefficient (NRC) tells us just how much sound those products can soak up. NRC is measured on a scale that ranged from 0 to 1\*.  
EN 13964:2004+A1:2006.

### Care And Cleaning

Remove dust and dirt by vacuuming or wiping with a soft cloth or sponge and a solution of carpet or upholstery shampoo. Always use a soft, damp cloth and blot dry.

### Privacy

Provides the user with a comfortable space to work in private whilst reducing noise.

### Weight

The approximate weight of our screens is 2000gsm.

### Fixing and Brackets

Included as standard.

### Fire Testing

EN13501-1:2007+A1:2009.
